

AMO seminar program - Fall 2014

25/9 **Photoelectron Circular Dichroism from Multiphoton Ionization with Femtosecond Laser Pulses**

Thomas Baumert

Institut fuer Physik und CINSaT, Kassel

23/10 **Photophysics of small carbon cluster anions**

Klavs Hansen

University of Gothenburg / IFA

NB: 1525-323

27/11 **Ionization of He by an Intense, Few-cycle Attosecond XUV Pulse**

J. M. Ngoko Djiokap

Department of Physics and Astronomy, The University of Nebraska

4/12 **Isomerizations of The Retinal Chromophore**

Yoni Toker

IFA

Place: Fysisk Auditorium

Time: 15.15. Coffee, tea and cake will be served at 15.05

Contact persons: Annette Svendsen, Jacob Sherson and Aurélien Dantan
