

GPC seminar program – spring 2016

17/2-16

Speaker: Jill Miwa, IFA

Title: Designing Materials for Quantum Computing

6/4-16

Speaker: Bernhard Schwingerheuer, MPI, Heidelberg

Title: Neutrinoless double beta decay searches with ^{76}Ge

18/5-16

Speaker:

Richard Dawid, Stockholm University

Title: String theory and the scientific method

Please note different time and place

18/5-16

Speaker: James M. Lisy, University of Illinois at Urbana-Champaign

Title: Non-covalent interactions: Balancing enthalpy and entropy, enabling size-selectivity, and controlling dynamics

27/5-16

Speaker: Fulvio Melia, University of Arizona

Title: Zero Active Mass in FRW Cosmologies

Please note different time and place

Place: Fysisk Auditorium

Time: 15.15. Coffee, tea and cake will be served at 15.05
